ABOUT ME

Full Stack Software Engineer with 1 year of experience, focused on systems architecture and software development with hands-on experience in cloud environments and actively engaged with the technology community in Brazil. Looking for an opportunity as a Junior Software Engineer.

SKILLS

Languages: Python, Node.js, SQL
Cloud & Infra: AWS, Terraform, Docker, CI/CD, Pipelines, PRs
Databases: MySQL, MongoDB, RDS
Tools: Git, GitHub, REST API, Swagger/OpenAPI
Concepts: Software Architecture, OOP,DDD, Deploy, Unit Testing, Integration Testing, Scrum, Docs
AI: AI-Powered Development, Claude Code, Devin
Languages: Portuguese (Native), English (Advanced)

EXPERIENCE

Software Engineering Intern Sep. 2025 – Jun. 2026
Itaú Unibanco São Paulo, Brazil

- Developed an internal **end-to-end** product impacting multiple directorates, from architecture and technical decisions to business stakeholder alignment
- Built the full **AWS** infrastructure (ECS, Lambda, Athena, S3, RDS, IAM, VPC) with a Python/Streamlit frontend, ensuring scalable and secure delivery
- Developed unit and integration tests and managed change control processes, ensuring continuous product quality and stability
- Led **3 interns** throughout the project, coordinating technical deliveries and business alignments

Robotics Educator Mar. 2023 – Jul. 2023
Instituto Federal de São Paulo

- Taught programming logic and robotics with **Arduino** to high school students, with emphasis on building autonomous robots in **C/C++**
- Prepared teams for regional and national robotics competitions

PROJECTS

Aprova | Python, Streamlit, Gemini 2025

- Online education platform for preparation in São Paulo's top university entrance exams, developed and **winner of the Alura + Google Hackathon**
- Awarded a **full scholarship** to study at FIAP as the hackathon grand prize
- Available at: github.com/matheusaudibert/projeto-aprova

Newsletter Bot | Bot, Node.js, Discord.js, API 2026

- Official tech news Discord bot for Filipe Deschamps, delivering daily technology updates
- Active in more than **100 servers** on Discord
- Available at: github.com/matheusaudibert/newsletter-bot

Grux | Node.js, Discord.js, MongoDB, Cache, API 2026

- Service that simplifies access to Discord profile and presence data through a RESTful API and WebSocket
- Monitoring more than **60 users** on Discord
- Available at: github.com/matheusaudibert/grux

EDUCATION

FIAP Aug. 2025 – Aug. 2028
Bachelor's in Software Engineering São Paulo, Brazil

ONLINE PRESENCE

Servidor dos Programadores (Discord) 2025 – Present
Founder & Administrator

- Founded and lead an online programming community with more than **20,000 members** on Discord
- Organize online and in-person events in São Paulo, democratizing access to tech education

Audibert (YouTube) 2025 – Present
Technology Content Creator

- Produce videos about programming, explaining technical concepts in a didactic, accessible and engaging way
